Seeking product designer roles in the UAE | Notice period: up to 60 days, negotiable

## SUMMARY

---

Product Designer with nearly 4 years of experience designing AI-powered search, discovery and complex internal tools at Alamy (PA Media Group), a global stock image marketplace. Computer science graduate and former software developer who designs inside design systems, works closely with engineering, and uses Claude Code and Figma MCP to move from research to production-ready designs. Known for evidence-led decisions backed by usability testing, analytics and A/B tests.

## EXPERIENCE

---

### Product Designer

**Apr 2026 – Present**

*Alamy (PA Media Group)*

- Led design of the AI Search Assistant, a conversational image search on alamy.com, from an inherited concept to a live beta in September 2026.
- Ran 3 rounds of unmoderated usability testing (36 participants) and combined the strongest variants, raising unprompted discovery from 50% to 83% and cutting time to find the feature from 31.5s to 16.5s.
- Designed the AI experience end to end: onboarding, empty and loading states, answers grounded in real images, voice input and a persistent route back to classic search.
- Created a new AI token family and "ai" button variant in Alamy Design System 2.0, including floating buttons for mobile and desktop; redesigned Smart Search as a toggle, with an A/B test confirming no revenue impact.
- Led discovery for the Lightbox rebuild: 5 stakeholder interviews, 20 usability sessions across 8 countries, a 14-competitor benchmark and a quarter of GA4 data. Found that under 1% of Lightbox visits led to any action and reframed the project into two products.
- Mapped evidence-traced user journeys and audited designs against 33 requirements with Claude Code, catching 8 requirement gaps before handoff.
- Designed Curated Collections inside the live curation tool, rebuilding wireframes in the real design system through Figma MCP and surfacing 3 gaps missing from 40 requirements.

### Junior Product Designer

**Dec 2022 – Mar 2026**

*Alamy (PA Media Group)*

- Sole designer of Behind the Search, an internal curation tool now live and used daily by the content team to boost and suppress search results, manage collections and edit metadata in bulk.
- Cut the time to correct search results from days to under 24 hours and halved the time to move images between collections; rated 4.5/5 for clarity and ease of use in early team feedback.
- Tested prototypes weekly with the content team and partnered with search engineers to integrate boosting and suppression with the search infrastructure.
- Led the Contributor Experience Revamp for the upload and tagging platform: set success metrics from Microsoft Clarity heatmaps, funnels and session data (11,035 registration and 25,746 upload sessions) and designed AI-generated metadata and bulk editing.
- Reduced steps to upload and tag from about 25 to 10 (60% fewer), with 100% task completion and 4.6/5 satisfaction across 3 rounds of usability testing.
- Led service design discovery, creating service blueprints for the Enterprise and Contributor journeys with 5 departments and presenting them to leadership; the contributor blueprint became the foundation for the revamp.

## Software Developer

Jul 2022 – Nov 2022

Alamy (PA Media Group)

- Built front-end and back-end features for Alamy's public website, and reusable, accessible UI components.

## User Experience Designer (Intern)

Jul 2020 – Nov 2020

Larkcs Life Link

- Designed user journeys, wireframes and prototypes for a medical consultation app.

## PROJECTS

---

### Brand Identity: between us

2025 – Present

*Beyond Zeal, monthly live music series*

- Named and branded a monthly live music series, creating a colour system that changes with each edition, posters, tickets, keepsakes and a full Instagram template kit.

## SKILLS

---

**Research:** User research, usability testing, user interviews, analytics, heatmaps, A/B testing, problem framing, competitive analysis

**Design:** Product design, UX design, UI design, interaction design, AI product design, prototyping, wireframing, journey mapping, service design, design systems

**Tools:** Figma, Figma AI, Figma MCP, Code Connect, Claude Code, Claude, Adobe Creative Suite, UserTesting.com, Dovetail, GA4, Microsoft Clarity, Mural, Notion, Jira, Confluence

**Development:** HTML, CSS, JavaScript, React

## EDUCATION

---

### BTech, Computer Science and Engineering

2018 – 2022

*College of Engineering Trivandrum | CGPA 8.9/10*

## CERTIFICATIONS

---

- AI for Designers, Interaction Design Foundation
- User Research Methods, Interaction Design Foundation
- Service Design, Interaction Design Foundation
- Design Thinking, Interaction Design Foundation
- Prompt Engineering, Udemy

## LANGUAGES

---

English (Fluent), Hindi (Fluent), Arabic (Basic reading and writing), Malayalam (Native)
