Trivandrum, India · Relocating to UAE · Notice period up to 60 days, negotiable

Product Designer with 4 years at Alamy (PA Media Group), a marketplace of 450M+ images and videos. I shipped an AI search assistant from concept to live beta in under 4 months and designed an internal tool that cut search fixes from days to under 24 hours. Former software developer: I prototype in code and test on live links.

KEY HIGHLIGHTS

- **Shipped an AI search assistant in under 4 months,** live on alamy.com across 450M+ images and videos.
- **Cut search fixes from days to under 24 hours** as sole designer of an internal curation tool.
- **Designed and coded a reusable AI button,** now part of Alamy's design system (DS 2.0).

EXPERIENCE

Alamy Images (PA Media Group)

Jul 2022 – Present

Stock image and video marketplace · Trivandrum, India

Product Designer

Apr 2026 – Present

- Designed Alamy's AI Search Assistant end to end on desktop and mobile, taking it from concept to **live beta in under 4 months**.
- Fixed a discoverability problem found in usability testing by redesigning search hierarchy; an **A/B test confirmed no clear negative commercial impact**.
- Created and coded a dedicated **AI button component** (tokens, variants, states) and added it to the design system.
- Led discovery for a 15-year-old save feature (**20 usability sessions in 8 countries**, 5 stakeholder teams, 14 competitors, a quarter of analytics) and reframed the brief into **two products on one shared foundation**.
- Audited **33 requirements** against journey maps and **caught 4 gaps** before engineering handoff.

Junior Product Designer

Dec 2022 – Mar 2026

- Sole designer of an internal curation tool: **search fixes went from days to under 24 hours**; moving images between collections **2× faster**.
- Ran **weekly testing** with the content team; early ease-of-use rating **4.5/5**. Co-designed boost and suppress with search engineers.
- Led service design across **5 departments**, mapping **4 as-is service blueprints**; presented to leadership, exposing manual bottlenecks.

Software Developer

Jul 2022 – Nov 2022

- Built front-end and back-end features and **reusable, accessible UI components** for alamy.com.

UI/UX Design Intern · Multiple projects, incl. Larkcs Life Link

2019 – 2021

- Designed journeys, wireframes and prototypes for web and mobile, including a medical consultation app.

SKILLS

Product design	Interaction design, information architecture, design systems, responsive design, workflow design, AI interaction patterns
Research	Usability testing, stakeholder interviews, competitor analysis, journey mapping, service blueprints, analytics, A/B testing
Tools	Figma, Figma MCP, Code Connect, Claude Code, UserTesting.com, GA4, Microsoft Clarity, Dovetail, Mural, Jira, Notion, Confluence
Technical	HTML, CSS, JavaScript, React, coded prototypes (Vercel)

EDUCATION, CERTIFICATIONS AND LANGUAGES

Education	**BTech, Computer Science and Engineering**, College of Engineering Trivandrum · 2018 – 2022 · GPA 8.9
Certifications	Interaction Design Foundation: AI for Designers, User Research Methods, Usability Testing, Service Design, Design Thinking · Udemy: Prompt Engineering
Languages	English (fluent) · Hindi (fluent) · Malayalam (native) · Arabic (basic)
